**Hiring Manager**  
Fasgo

**Dear Hiring Manager,**

I am excited to apply for the DevOps Internship at Fasgo, which I discovered on LinkedIn. Your focus on innovative, cutting-edge solutions aligns with my passion for automation and cloud technologies, making this role an ideal opportunity to contribute to your dynamic team.

As a second-year Software Engineering student at ENSET Mohammedia, I bring relevant experience through academic projects, including a Bash script to automate backups and an AWS IaC solution using Terraform to deploy a Dockerized Node.js app via a CI/CD pipeline with GitHub Actions. My training includes two Red Hat Linux Fundamentals badges, a DevOps course on Udemy, and an ongoing AWS course with hands-on labs, complemented by my teamwork experience organizing a three-day hackathon with the Google Developer Group at ENSET Mohammedia.

I am eager to bring my skills in Linux, scripting, and CI/CD to Fasgo, supporting your mission to advance scalable infrastructure solutions while growing as a DevOps professional. Thank you for your consideration—I look forward to discussing how I can contribute to your team.

**Sincerely,**  
BOURHYM Mohammed
